

SMARTES

Company Summary

Practical NetSuite solutions built from real-world experience

Overview

Smartes creates practical solutions that help businesses get more out of NetSuite. Built from the hands-on consulting experience, Smartes was created after seeing the same operational challenges appear across clients, industries, and workflows. Instead of solving those needs one company at a time, Smartes turns proven ideas into solutions that can help more businesses.

What makes Smartes different

- Built from real NetSuite consulting experience
- Solutions shaped by actual business needs
- Designed to work natively within NetSuite
- Provides more visibility and control than black box solutions

How Smartes fits into NetSuite

Smartes solutions are designed to work naturally within the NetSuite environment. Rather than relying on outside platforms that must be connected back into the system, Smartes focuses on solutions that feel like a practical extension of NetSuite itself. This approach helps businesses improve usability, reduce manual work, and solve process gaps with solutions that are easily manageable.

Featured solutions

Online Pages

Create secure online pages connected to NetSuite so customers, vendors, and other users can view information and complete actions without needing a NetSuite login.

OCR

Automated order entry from emails and attachments, with key data extracted into NetSuite transactions.

Search Sync

Send NetSuite data to Power BI or Tableau more easily so your team can build reports and dashboards without manual exports.

Smartes at a glance

Focus

NetSuite-native solutions that extend and improve everyday business processes

Approach

Practical, transparent, and built to work naturally within the NetSuite environment

Ideal for

Teams looking to improve efficiency, visibility, and usability across key workflows

Product Uses

- Sharing live NetSuite information securely
- Automating order entry from emails and attachments
- Reducing manual work across key processes

Key outcomes

- More value from NetSuite
- Better visibility across processes
- Reduced manual work
- More connected and user-friendly solutions
