

The Future, Today

Interactive Online Pages for Your Vendors,
Customers, Partners, or Sales Team

POWERFUL DATA IN REAL TIME

Interactive NetSuite Access

Online Pages gives external users a simple, secure way to interact with NetSuite records in real time. Instead of relying on portal logins, manual follow-up, or disconnected tools, you can share a secure page that lets users view details, take action, and stay informed from any device. This online app gives your customers, dealers and vendors access to essential transactions and information from NetSuite. With it, your visitors can submit quotes or orders, view order statuses and share files. If they are a vendor they can provide shipping information and acknowledge orders.

Why Choose Interactive Online Pages?

User Engagement - Traditional systems limit fast access to order statuses and restrict viewing and editing.

Less Manual Work - Online pages are less time consuming and easier to update. Plus, there's less paperwork and manual entry required.

Less Friction - Our solution combines orders, statuses, and customer communications on one easy platform.

Cost - E-commerce and user interface modules are expensive. Smartes is competitively priced and less costly to implement.

Why Smartes?

✓ Online Pages was designed specifically to help companies extend NetSuite to customers, vendors, partners, and internal teams in a practical, user-friendly way.

✓ The solution can support order visibility, approvals, acknowledgments, document collection, payments, and other external transaction workflows.

✓ Smartes gives businesses a modern self-service experience without the complexity of a large portal or full eCommerce implementation.

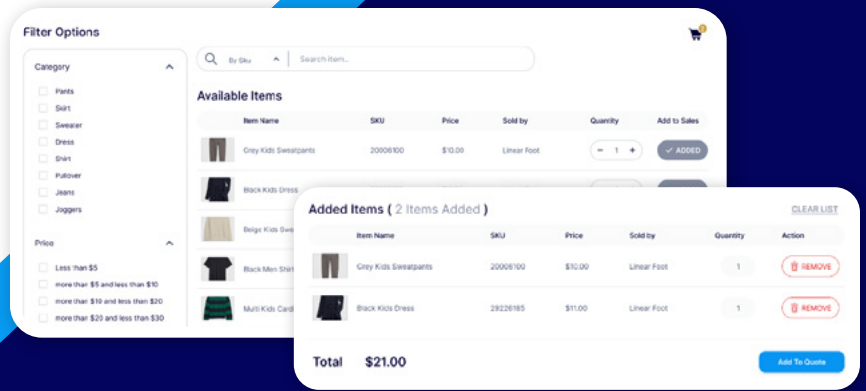

Order Status: Pending Production
Estimated Delivery Date: 10 May - 25 May

Pending Approval | Pending Pre-Flight | Fulfillment Processed | Customer Approval | Pending Production | In Production | Pending Delivery | In Delivery | Delivered

Order Number	Date	Number of Items	Total	Attachments
SO-0006	11/28/2022	3	\$70.00	invoice.pdf pdf.pdf image_placeholder.jpg word.docx Asset_1_3u.png

Added Items (2 Items Added) CLEAR LIST

Item Name	SKU	Price	Sold by	Quantity	Action
Grey Kids Sweatpants	20005700	\$70.00	Linear Foot	1	REMOVE
Black Kids Dress	29226185	\$11.00	Linear Foot	1	REMOVE
Total		\$21.00			Add To Quote

New Item Workflow

- 1 The visitor opens a shared link or scans a QR code.
- 2 They are redirected to an online page.
- 3 The visitor can either submit a new transaction, view transaction status, submit and pay for a quote or order, depending on how the page is configured.

Actions for Editable Data Include:

- ✓ Approve/Acknowledge
- ✓ Reject
- ✓ Share Files
- ✓ Edit Fields
- ✓ Add Items

ENDLESS FEATURES

Simplicity at Your Fingertips

Transaction Views – View or edit transactions, modify them at the item level, and get a complete history of past transactions.

Product Search – For customers, search by SKU or CPN and apply facet filters to find specific products, just like on a standard e-commerce platform.

Pricing – View pricing at the customer level or hide pricing to allow requests for quotes, enabling seamless control no matter the transaction.

File Sharing – Share and receive files of any format, including PNGs, PDFs, and Excel sheets, for 100% transparency.

Order Statuses – Apply custom workflow business logic and give users real-time status updates for complete order management.

Bridge the Gap Between Internal and External – Define fields for data capture, access real-time info from external parties, and share via website, SMS, emails, or QR codes.

Order Status: Pending Production
